Summer Homework Task 2

"Health and Social Care" is a term which covers a wide range of integrated services from both health care and social care providers. It covers a range of subject areas including communication, health and safety issues, equality and diversity and human growth and development.

Over the summer you are required to carry out research which you must use to create a PowerPoint presentation covering the following areas:

- An outline of the types of settings, organisations and providers which make up the health and social care sector including some information on health and social services in the Bromley area. Be specific about the services you research – which services take care of health issues and which services take care of the social side of care needs.

- Information on some of the employment opportunities that are available in the health and social care sector and what qualifications are needed for these. Research the roles and responsibilities of three health care professionals and three social care professionals.

- A paragraph explaining why you have chosen to study Health and Social Care".

Please bring your presentation with you to the first lesson in September
