

## KS5 Media Studies summer project

Each year sixth form media studies' students get the chance to create their own media productions.

For your summer project we would like you to create your own media product which should be completed and sent to Ms Gould, the head of media, via email [egould@bwsgirls.org.uk](mailto:egould@bwsgirls.org.uk). Please state whether you are studying BTEC or A Level media in your email. Alternatively, you can save your work on a cloud and send the link. Please do this before September 2021. Please choose **one** of the following briefs and use a phone/video camera to film:

1: Create 90 seconds - two minutes of the opening scene for an informative television documentary aimed at an audience of 14–16 year olds. These opening scenes may or may not include a title sequence. The scenes may include up to a maximum of 20 seconds of found footage.

A range of camera shots, angles and movement (including close ups and establishing sequence). Use of diegetic sound and a narrator using voiceover and/or address to camera. The scenes may include up to a maximum of 20 seconds of found footage. Editing of footage and dialogue required.

2: Create the opening 90 seconds - two minutes of an original music video to accompany a pop music track aimed at an audience of 14-18 year olds. A

minimum of two filming locations. A narrative appropriate to a music video (e.g. a performance montage, a linear narrative illustrating or commenting on the song, or a mix of performance montage). You may use an existing song as the basis of your music video. The song does not need to be copyright free. A range of camera shots, angles and movement (including close ups and establishing shots). The video may include up to a maximum of 20 seconds of found footage. This footage cannot be editing of original footage to match the song /genre of music.
